DOLPHIN ARCHITECTS AND BUILDERS ANNOUNCES TWO NEW LOCATIONS *On the Web at www.dolphindesignbuild.com and in East Cooper*

July 12, 2007- Charleston, SC— Dolphin Architects and Builders announces the launch of a new interactive website at www.dolphindesignbuild.com and the relocation of the residential design/build firm's East Cooper office.

Created by local graphic design firm Slant Media, Dolphin's newly redesigned website provides a more user friendly structure combined with more extensive access to Dolphin's range of custom home projects through an interactive portfolio. The site pays tribute to Dolphin's award winning customer service with an interactive questionnaire that allows prospective clients the opportunity to provide quick and detailed feedback directly to the Dolphin team.

To better accommodate Dolphin's growing team of architects and builders, the firm's East Cooper office has relocated from 966 Houston Northcutt Boulevard to 503 Belle Hall Parkway, Suite 102 in Mt. Pleasant. The new location will house Rob Schrauth, East Islands Construction Manager as well as Dolphin architects and project managers. Dolphin's headquarters will remain at 3730 Bohicket Road on Johns Island.

For over two decades, Dolphin has been the design/build firm of choice for the discerning Kiawah and Seabrook homeowner. Now Dolphin's collection of custom-built residences, from striking showcase homes to thoughtful cottages, can be found throughout Charleston, Mount Pleasant and the neighboring islands. For more information on Dolphin, contact 843-768-2404 or visit the website at www.dolphindesignbuild.com.
